GANUSHA ERANDA

IT AUTOMATION SPECIALIST

PROFILE SUMMARY

IT Support & Systems Engineer with 4+ years' experience administering enterprise systems, databases, and websites, and supporting sales and operations teams with reporting, integrations, and process automation. Hands-on with MySQL and WordPress administration, API/webhook-based integrations, and ITIL-aligned service management. Comfortable configuring workflows, monitoring data quality, and coordinating with developers, vendors, and cross-functional teams across time zones. ITIL 4 and IBM Cybersecurity Fundamentals certified, with a strong record of improving system reliability and producing clear technical documentation — well suited to owning CRM, automation, and IT systems end to end, including the upcoming Odoo migration.

PROFESSIONAL EXPERIENCE

IT Support Engineer 2024 – 2025

Modernmark Development (Multinational), Colombo, Sri Lanka

- Diagnosed and resolved software bugs and system anomalies for web applications, improving application reliability by ~15% — experience directly relevant to maintaining CRM, website, and integration reliability.
- Worked with Git/GitHub and REST-style workflows for version control and quality reviews, and coordinated fixes with developers — transferable to managing APIs, webhooks, and integration partners such as Zoho Flow, Make, or Zapier.
- Liaised with cross-functional, cross-time-zone teams to prioritize and resolve production issues, maintaining clear technical documentation throughout.

IT Systems & Operations Specialist 2021 – 2022

Search Advance Technology (Pvt) Ltd., Nugegoda, Sri Lanka

- Managed enterprise IT systems for 100+ users, including user accounts, access rights, and software provisioning — core basic IT support skills required for employee accounts and troubleshooting.
- Implemented ITIL-aligned ITSM frameworks for incident, problem, and change management, improving system reliability by 20% and cutting resolution time by 10%.
- Administered MySQL databases and WordPress-based websites end to end, including forms, security updates, backups, and content changes — directly applicable to website, CMS, and domain/hosting administration.
- Authored detailed process, configuration, and integration documentation, reducing knowledge-transfer time for new hires by 25%.

UI/UX Designer 2019 – 2020

Mylife International (Pvt) Ltd., Colombo, Sri Lanka

- Designed wireframes, mockups, and prototypes for web and e-commerce platforms, building a practical understanding of website structure, forms, and tracking touchpoints that carries over to CMS and analytics work.

EDUCATION

Bachelor of Information Technology (Hons), Software Engineering Expected 2026

ESU, Colombo, Sri Lanka

Higher Diploma in Information Technology, Software Engineering 2018

Pearson University United kingdom
