SOFT SKILLS

Problem-Solving • Analytical Thinking • Clear Written & Verbal Communication • Teamwork & Cross-Functional Collaboration • Customer Service • Adaptability • Time Management • Attention to Detail • Quick Learner • Working Under Pressure

PROFESSIONAL EXPERIENCE

Associate Software Engineer — *Talentone (Pvt) Ltd (Multinational), Sri Lanka*

2026

- Diagnosed and resolved software issues, application errors and system anomalies, performing root cause analysis and bug fixing to support reliable day-to-day application operations.
- Supported feature development and enhancements on web applications, working with PHP, JavaScript and MySQL under senior developer guidance.
- Took part in Git/GitHub workflows, including code reviews, branch management and quality checks before releases.
- Tested changes, reproduced reported defects and verified fixes to maintain software quality.
- Handled escalated technical issues through ticketing workflows and coordinated with cross-functional teams on production-impacting incidents.
- Provided clear end-user communication and maintained technical documentation to support consistent troubleshooting and knowledge transfer.

IT Systems & Operations Specialist — *Search Advance Technology (Pvt) Ltd., Nugegoda, Sri Lanka*

2021 – 2022

- Supported Windows and network environments for 100+ users, resolving hardware, software and connectivity issues.
- Delivered first- and second-line technical support and assisted with incident, problem and change management processes.
- Administered MySQL databases and web-server environments, including routine backups, security updates and user-access controls.
- Created IT process and configuration documentation to improve onboarding and knowledge transfer.

UI/UX Designer — *Mylife International (Pvt) Ltd., Colombo, Sri Lanka*

2019 – 2020

- Designed user-facing wireframes and prototypes and collaborated with development teams to improve interface usability.
- Worked with technical teams on user-focused system interfaces and visual requirements.

SELECTED PROJECTS

Lost & Found Management System — *University Final Project*

- PHP, MySQL and XAMPP based web application featuring user authentication, item reporting, categories, claims, admin functions, database-driven pages and file uploads.

Grocery Management System — *PHP / MySQL Web Application*

- PHP and MySQL based web application for managing grocery operations, including product and category management, stock tracking, supplier records, sales/billing and role-based admin and staff access.
- Developed following the Agile (iterative) software development model: requirements analysis, database (ER) and UI design, incremental development, testing and deployment.
