PROFILE

IT Support & Systems Engineer with 4+ years' experience delivering technical support, systems administration, and IT service management across multi-user enterprise environments. Skilled in diagnosing and resolving hardware, software, network, and application issues, implementing ITIL-aligned processes, and maintaining clear technical documentation. ITIL 4 and IBM Cybersecurity Fundamentals certified, with a strong record of improving system reliability and reducing incident resolution times.

TECHNICAL SKILLS

- IT Service Management: ITIL 4-aligned processes, incident & problem resolution, technical documentation, SLA-driven support
- Systems & Security: Enterprise system monitoring, IT infrastructure maintenance, cyber security fundamentals (IBM), user access & compliance support
- Databases & Web: MySQL , WordPress CMS administration & SEO optimization, Shopify theme customization & storefront UI
- Development Tools: Git, GitHub, PHP,WordPress

PROFESSIONAL EXPERIENCE

IT Systems & Operations Specialist | Search Advance Technology (Pvt) Ltd., Nugegoda, Sri Lanka 2021 – 2022

- Managed and maintained enterprise IT systems supporting 100+ users across Windows and network environments, ensuring high availability, security, and regulatory compliance through proactive monitoring and preventive maintenance.
- Implemented ITSM (ITIL-aligned) frameworks covering incident, problem, and change management, improving overall system reliability by 20% and cutting average incident resolution time by 10%.
- Authored detailed IT process, configuration, and troubleshooting documentation used across the support team, reducing knowledge-transfer time for new hires by 25%.
- Delivered first- and second-line technical support across hardware, software, network, and application issues, consistently achieving high end-user satisfaction Administered MySQL databases and WordPress-based sites via system admin, including routine backups, security updates, and basic SEO optimization.

IT Support Engineer | Modernmark Development (Multinational), Colombo, Sri Lanka 2024 – 2025

- Diagnosed and resolved complex software bugs and system anomalies across web applications, improving application reliability by ~15% through structured analysis.
- Collaborated within a globally distributed support/IT team, using Git and GitHub for version control and actively participating in code reviews to maintain code quality standards.
- Liaised with cross-functional teams across time zones to prioritize and resolve production issues, maintaining clear technical documentation throughout.

UI/UX Designer | Mylife International (Pvt) Ltd., Colombo, Sri Lanka 2019 – 2020

- Designed user-facing wireframes, mockups, and prototypes for web and e-commerce platforms, including Shopify store layouts and storefront customization.
- Customized Shopify themes and UI layouts to improve storefront usability, visual consistency, and customer experience.
- Applied attention to detail and user-centered design principles that were later carried into systems documentation and end-user support work.
